

iPath[®] Bloomberg Commodity Index Total ReturnSM ETN

DJP

Overview

The iPath[®] Bloomberg Commodity Index Total ReturnSM ETNs (the "ETNs") are designed to provide exposure to the Bloomberg Commodity Index Total ReturnSM (the "Index"). The ETNs are riskier than ordinary unsecured debt securities and have no principal protection. The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. An investment in the ETNs involves significant risks, including possible loss of principal, and may not be suitable for all investors.

The Index reflects the returns that are potentially available through an unleveraged investment in futures contract on physical commodities comprising the Index plus the rate of interest that could be earned on cash collateral invested in specified Treasury Bills. The Index is a rolling index that is rebalanced annually. Owning the ETNs is not the same as owning interests in the commodities futures contracts comprising the Index or a security directly linked to the performance of the Index. For additional information regarding the risks associated with the ETNs, please see "Selected Risk Considerations" below.

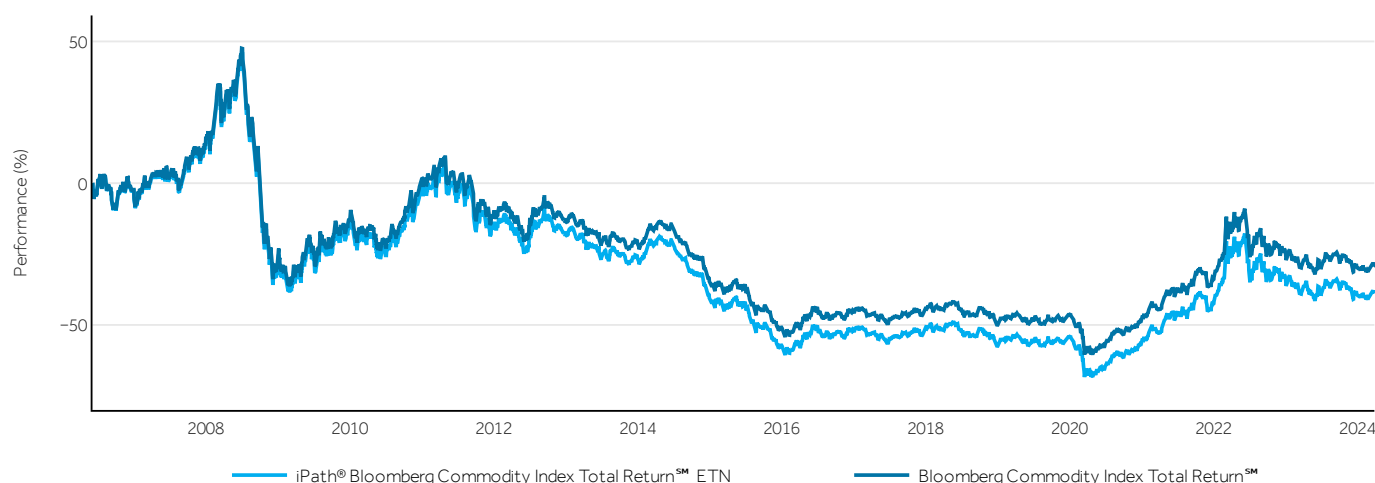

Market Indicators

Closing Indicative Note Value	\$32.04
Market Capitalization	\$499,407,191
ETNs Outstanding	15,586,991

The chart above shows the historical performance of the ETN and the Index from the ETN Inception Date which was June 6, 2006 to the previous days closing price.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS

ETN and Index Returns

Return Types	1m	3m	6m	YTD	1y	3y	Since ETN inception
ETN Closing Indicative Note Value Return	3.78%	2.34%	-3.3%	2.34%	-1.44%	9.66%	-2.62%
Bloomberg Commodity Index Total Return SM	3.31%	2.19%	-2.54%	2.19%	-0.56%	9.11%	-1.82%

* For any historical period of one year or longer, closing indicative note value returns are shown on an annualized basis. Source: Barclays, subject to change.

ETN closing indicative note value returns show the change in the closing indicative value of the ETNs over the relevant period, expressed as a percentage. The closing indicative note value of an ETN is an amount per ETN calculated on each valuation date that reflects the change in value of the ETN from the previous valuation date due to the daily change in the index level and the daily accrual of the investor fee and other applicable costs. The closing indicative note value of an ETN may differ from the actual trading price of the ETN at any time due to hedging or transaction costs, credit considerations, market liquidity, bid-offer spreads or other factors affecting the trading price of the ETN. For more information on how the closing indicative note value is calculated, please see the section "Specific Terms of the ETNs" in the prospectus relating to the ETNs.

Index returns show the change in the level of the index underlying the ETNs over the relevant period, expressed as a percentage. Index returns are calculated using the closing index level from the beginning of the relevant period to the end of the relevant period. For any historical period of one year or longer, index returns are shown on an annualized basis. Index returns are for illustrative purposes only and do not represent actual ETN performance. Index returns do not reflect any management fees, transaction costs, or expenses which would reduce your actual return, including the investor fee and applicable costs of the ETNs. Indexes are unmanaged and one cannot invest directly in an index.

NOT FDIC INSURED • NO BANK GUARANTEE • MAY LOSE VALUE

iPath[®] Bloomberg Commodity Index Total ReturnSM ETN

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investment, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. See additional information below for how return figures are calculated. **PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS**

Uncertain Tax Treatment: Significant aspects of the tax treatment of the ETNs are uncertain. You should consult your own tax advisor about your own tax situation.

The ETNs may be sold throughout the day on the exchange through any brokerage account. Commissions may apply and there are tax consequences in the event of sale, redemption or maturity of ETNs.

Issuer Redemption: Barclays Bank PLC has the right to redeem or "call" the ETNs (in whole but not in part) at our sole discretion without your consent on any business day on or after the inception date until and including maturity.

Barclays Bank PLC has filed a registration statement (including a base prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the base prospectus for this offering in that registration statement and other documents Barclays Bank PLC has filed with the SEC for more complete information about Barclays Bank PLC and this offering. You may get these documents for free by searching the SEC online database (EDGAR) at www.sec.gov. Alternatively, you may obtain a copy of the base prospectus from Barclays Bank PLC by calling toll-free 1-888-227-2275 (extension 7-7990).

iPath, iPath ETNs and the iPath logo are registered trademarks of Barclays Bank PLC. "Bloomberg[®]", "Bloomberg Commodity IndexSM", "Bloomberg Commodity Index Total ReturnSM" and "BCOM" are service marks of Bloomberg Finance L.P. and its affiliates (collectively, "Bloomberg") and have been licensed for use for certain purposes by Barclays Bank PLC. Any ETNs based on the Bloomberg Commodity Indices are not sponsored, endorsed, sold or promoted by Bloomberg, or any of their subsidiaries or affiliates. None of Bloomberg, or any of their subsidiaries or affiliates makes any representation or warranty, express or implied, to the owners of or counterparties to the ETNs or any member of the public regarding the advisability of investing in securities or commodities generally or in the ETNs particularly. All other trademarks, servicemarks or registered trademarks are the property, and used with the permission, of their respective owners.

1. **Market Capitalization** = Closing Indicative Note Value x ETNs Outstanding
2. **The investor fee rate** per ETN is equal to 0.70% per year *times* the principal amount of your ETNs *times* the applicable index factor and is calculated on a daily basis in the following manner: The investor fee on the inception date was equal to zero. On each subsequent calendar day until maturity or early redemption, the investor fee will be equal to: (1) the Investor Fee Rate *times* (2) the principal amount of your ETNs *times* (3) the applicable index factor on that day (or, if such day is not a trading day, the Index Factor on the immediately preceding trading day) *divided by* (4) 365. The Index Factor on any given day will be equal to the closing value of the Index underlying the ETNs on that day *divided by* the Initial Index Level. The Initial Index Level for this series of iPath ETNs is the closing value of the Index underlying the ETNs on the Inception Date.
3. **Intraday Indicative Value.** The "intraday indicative value" meant to approximate the value of the ETNs during the current trading day by reference to the underlying index is calculated and published during the course of each trading day. The intraday indicative value is intended to provide investors with an approximation of the effect that intraday changes in the level of the underlying index would have on the closing indicative value of the ETNs. The intraday indicative value only reflects the accrued investor fee and other applicable costs at the close of business on the preceding day, but does not include any adjustment for the investor fee or applicable costs accruing during the course of the current day. For more information on how the intraday indicative value is calculated, please see the section "Valuation of the ETNs" in the prospectus relating to the ETNs.
The intraday indicative value is provided for reference purposes only. It is not intended as a price or quotation, or as an offer or solicitation for the purchase, sale, redemption or termination of the ETNs, nor does it reflect hedging or transaction costs, credit considerations, market liquidity, or bid-offer spreads. Published index levels from the sponsors of the indices underlying the ETNs may occasionally be subject to delay or postponement. Any such delays or postponements will affect the level of the index and therefore the intraday indicative value of the ETNs. Index levels provided by the sponsors of the indices underlying the ETNs do not necessarily reflect the depth and liquidity of the underlying markets for the index components. For this reason and others, the actual trading price of the ETNs may be different from their intraday indicative value.

Selected Risk Considerations

An investment in the iPath ETNs described herein (the "ETNs") involves risks, including possible loss of principal, and may not be suitable for all investors. Selected risks are summarized here and select product specific risk factors are summarized under "Select Risk Considerations" on the relevant product pages, but we urge you to read the more detailed explanation of risks described under "Risk Factors" in the applicable product prospectus.

You May Lose Some or All of Your Principal: The ETNs are exposed to any change in the level of the underlying index, or the Volume Weighted Average Price ("VWAP") level, in the case of the iPath[®] S&P MLP ETN, between the inception date and the applicable valuation date. Additionally, if the level of the underlying index or the VWAP level, is insufficient to offset the negative effect of the investor fee and other applicable costs, you will lose some or all of your investment at maturity or upon redemption, even if the value of such index or the VWAP level has increased or decreased, as the case may be. Because the ETNs are subject to an investor fee and other applicable costs, the return on the ETNs will always be lower than the total return on a direct investment in the index components. **The ETNs are riskier than ordinary unsecured debt securities and have no principal protection.**

Credit of Barclays Bank PLC: The ETNs are unsecured debt obligations of the issuer, Barclays Bank PLC, and are not, either directly or indirectly, an obligation of or guaranteed by any third party. Any payment to be made on the ETNs, including any payment at maturity or upon redemption, depends on the ability of Barclays Bank PLC to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Barclays Bank PLC will affect the market value, if any, of the ETNs prior to maturity or redemption. In addition, in the event Barclays Bank PLC were to default on its obligations, you may not receive any amounts owed to you under the terms of the ETNs.

A Trading Market for the ETNs May Not Develop: Although the ETNs are listed on a U.S. national securities exchange, a trading market for the ETNs may not develop and the liquidity of the ETNs may be limited, as we are not required to maintain any listing of the ETNs.

No Interest Payments from the ETNs: You may not receive any interest payments on the ETNs.

Restrictions on the Minimum Number of ETNs and Date Restrictions for Redemptions: You must redeem at least 30,000 ETNs of the same series (unless specified otherwise in the pricing supplement for the ETNs) at one time in order to exercise your right to redeem your ETNs on any redemption date. You may only redeem your ETNs on a redemption date if we receive a notice of redemption from you by certain dates and times as set forth in the product prospectus.

NOT FDIC INSURED • NO BANK GUARANTEE • MAY LOSE VALUE
